OLAORE ABRAHAM IBORIDA

Full Stack Software Engineer

abrahamiborida@gmail.com +234 806 021 4037 Lagos, Nigeria

SUMMARY

Full Stack Software Engineer with 3+ years of experience building and supporting production financial applications across African markets. Experienced across mobile frontend development, backend services, REST APIs, databases, external financial integrations and production operations. Built banking applications and transaction features using Java, Spring Boot, Flutter and Temenos technologies, and independently built and operated a production fintech product from application interface through backend, database and financial service integrations.

EXPERIENCE

Product Engineer 01/2025 – Present
Wisemonie Nigeria

- Built and operate a production mobile money management application using Flutter, Java, Spring Boot, PostgreSQL and external financial service integrations.
- Developed core product functionality including authentication, wallet funding, budgeting, envelopes, transfers, savings, transactions, notifications and user settings.
- Designed backend REST APIs using Spring Boot with controller, service and repository layers, JPA/Hibernate, PostgreSQL and transactional business logic.
- Implemented wallet, budgeting and envelope workflows with database transactions, idempotency controls, locking mechanisms and validation for financial operations.
- Built internal money transfer flows that resolve customer wallet information, validate requests and initiate transfers through an external BaaS provider.
- Implemented transaction status handling and reconciliation logic around external financial operations to reduce duplicate processing and maintain consistent transaction records.
- Integrated external services including BaaS, Firebase, Redis and biller services for airtime, data, electricity and TV payments.
- Built Flutter screens, navigation, state management, API integration, authentication, local storage, forms, validation, transaction flows and production error states.
- Containerized and deployed the Spring Boot backend and PostgreSQL database using Docker and Render, with GitHub based source control and deployment workflows.
- Manage production releases, database changes, bug fixes, monitoring and emergency fixes for the Android application.
- Integrated Sentry for application error monitoring, Firebase for cloud services and notifications, and Shorebird for controlled over-the-air mobile updates.

Senior Technical Consultant 09/2024 – 06/2026
Techmaestrogroup Global Consult Nigeria

- Developed and delivered production mobile banking applications for financial institutions across Ethiopia and Burkina Faso using Temenos Quantum Visualizer and Java.
- Built banking features including login, bill payments, scheduled payments, transfers, beneficiaries and redesigned transaction flows.
- Modified and extended Java enterprise services to meet banking requirements and support mobile application workflows.
- Integrated mobile applications with backend Java services connected to Temenos T24 core banking systems.

- Worked across the mobile frontend, API layer and Java service layer to trace and resolve issues affecting banking transactions.
- Contributed to the Bank of Abyssinia mobile banking application in Ethiopia, taking features from implementation through production deployment.
- Developed features for Vista Bank Burkina Faso while the backend integration was migrated from T24 to Amplitude Sopra core banking.
- Redesigned the banking homepage, transfer experience, beneficiary management and transfer workflows for the Burkina Faso implementation.
- Collaborated with product, design and QA teams to deliver production banking functionality and resolve defects across application layers.

Associate Consultant 09/2023 – 08/2024
ITSS Nigeria Nigeria

- Developed production mobile banking features using Temenos Quantum Visualizer, Java services, REST APIs and backend integrations.
- Built the bills payment feature for Vista Bank Gambia, including frontend implementation and integration with third party payment services.
- Developed the Hajj payment feature for Vista Bank Sierra Leone.
- Built a back-office workflow that enabled bank account officers to receive and respond to customer requests.
- Modified Java service requests to transform existing transfer service functionality for bill payment use cases.
- Worked with Postman, JSON and REST APIs to test and integrate frontend and backend services.
- Delivered features through production while debugging issues across mobile application, API and Java service layers.

EDUCATION

B.Eng. Computer Engineering 2017 – 2023
Federal University of Technology, Minna

TECHNICAL SKILLS

Languages
Java, JavaScript, SQL

Backend
Spring Boot, REST APIs, Microservices, JPA/Hibernate, Express JS

Infrastructure & Tools
Docker, Git, Render, Redis, Postman, Firebase, Sentry, Shorebird

Engineering
API Integration, Authentication, JWT, Database Transactions, Idempotency, Concurrency Control, Production Debugging, Application Monitoring

Frontend & Mobile
Flutter, Android SDK, Temenos Quantum Visualizer, Kony JS

Databases
PostgreSQL, MySQL, MSSQL

Financial Technology
Core Banking Integration, Temenos T24, BaaS, Payment Gateways, Biller Integrations, Wallet Systems, Transaction Processing
