ABRAHAM IBORIDA

Software Engineer

Lagos, Nigeria · abrahamiborida@gmail.com · +234 806 021 4037

Fintech engineer with 4+ years shipping production mobile banking and payment systems across African markets (Burkina Faso, Ethiopia, Gambia).

EXPERIENCE

Product Engineer
Wisemonie - *2025 – Present , Nigeria*

- Built a behavioral money discipline product end-to-end: Flutter mobile app, Spring Boot backend, PostgreSQL data layer, and BaaS integration.
- Designed and implemented the envelope mechanic with time-anchored release, money is held in structured envelopes and released to spendable balance on user-defined schedules.
- Architected the system with internal-ledger envelope releases (zero transaction cost per release) to keep unit economics viable at scale, with real fees only on external money movement.
- Integrated biller infrastructure for in-app airtime, data, electricity, and TV payments, letting users spend directly from envelopes without breaking discipline.

Senior Technical Consultant

Techmaestrogroup Global Consult - *2024 - 2026, Nigeria*

- Architect and deliver mobile banking applications for tier-1 banks across Burkina Faso, Ethiopia, and Gambia, supporting real-world high-volume financial transactions.
- Transform Temenos T24 core banking APIs into scalable Experience APIs optimised for mobile consumption (Flutter/Android), bridging rigid legacy infrastructure with modern user experiences.
- Optimise Java/Spring Boot microservices for transaction orchestration, improving throughput, response time, and 99.9% uptime targets for mobile consumers.
- Collaborate cross-functionally with product, design, and QA teams to deliver fintech features including payments, onboarding, biometric authentication, and dashboards.

Associate Consultant

ITSS Nigeria *Sep 2023 – 2024 , Nigeria*

- Developed enterprise mobile applications using Temenos Quantum Visualizer with Spring Boot and MySQL backend integration for fintech clients.
- Built and consumed REST APIs to improve data flow between frontend and backend systems; delivered production-ready mobile UI from Figma designs.

CORE TECHNICAL SKILLS

Mobile: Flutter, Android SDK, React Native, Temenos Quantum Visualizer

Backend: Java, Spring Boot, System design, Express JS, REST APIs, Microservices, Prisma, Supabase

Databases: PostgreSQL, MySQL, MSSQL

Infrastructure & Tools: Docker, Git, Render, Postman, Figma

Fintech: Temenos T24, Core Banking Integration, BaaS, Payment Gateways, Biller Aggregators, Biometric Authentication, KYC/Compliance

EDUCATION & RECOGNITION

B.Eng. Computer Engineering — Federal University of Technology, Minna *2017 – 2023*
